

MediWork

Occupational Health
Management Platform

The screenshot displays the MediWork software's user interface. At the top, there are three main sections: 'Pre-Placement Assessments' (In Progress: 112), 'Manager-raised Referrals' (Awaiting Triage: 30, In Progress: 20), and 'Self-raised Referrals' (Awaiting Triage: 10, In Progress: 5). Below these are 'Population Status' indicators for different health metrics. The central part of the screen shows 'Next MediBook Appointments' for today, listing patients like Jimmy Blythe, Volante, and Respiratory Manager-raised. On the left, there's a 'People Manager' sidebar with tabs for Person, Organisation, Health Records, and Evidences. The main content area also includes a 'Communication' section with various patient records.

Tailored for you and your clients

Move to MediWork and start using the most flexible and powerful Occupational Health software today.

Only MediWork allows you to build your own service with our library of "Health Modules" - giving you the ultimate power over the service you provide your clients.

Choose the right features from customer to customer, and tailor every step of the journey with custom workflows, questionnaires, and much more.

Simplify every part of your Occupational Health workflow:

On-Boarding

Whether workplace pre-placement or residential assessment MediWork manages and guides every step of the process

Health Surveillance

Track, manage and log regular health assessments across patients in all your clients with personalised plans

Case Management

Immediately identify and escalate interventions or assessments with tailored, best-fit processes

... And much more
Built-in KPI tracking, robust Single-Sign-On, and secure API integrations are just a few of the great included features

Key features of MediWork at a glance

Universal Health Modules

Select from an extensive list of health service offerings - from Eye Health to Respiratory Care, from Skin Health to HAVS and more: tailoring the MediVue tool to exactly the service your firm provides. Use those same modules to provide precise services to your clients and patients: using only what's relevant and useful.

Process Guides

MediWork is designed to guide and assist users through every Occupational Health activity: from on-boarding to daily health management. Always know the next step with built in guides and smart risk & decision scoring.

Communications and Reporting

Keep your clients and patients in-the-loop with built in reports and messaging. Generating work fitness certifications and referral letters has never been easier or more secure than with MediWork.

Realise real-world benefits with MediWork

Guided workflows and customisable questionnaires eliminate administrative burden during on-boarding or surveillance: letting you focus on revenue-add and care-centric jobs.

Collaboration and co-working across the full OH process allows doctors and clients to share and work together faster and easier while staying fully secure and highly legally compliant.

Configure the tool to fit your organisation to remove the usual cost of heavy systems development or extensive staff training.

Directly connect with patients in a secure and managed way - allowing you to reduce risk and speed up end to end processes. Stay in line with KPIs with in-built time tracking, while spending less time repeating common tasks.
